Student Eligibility requirements	**Web Developer Intern**
	We are seeking a **motivated** and talented Web Developer Intern to join our dynamic team. This role provides the opportunity to gain hands-on experience in web development, enhance your technical skills, and contribute to exciting projects. The ideal candidate will have a **strong understanding of WordPress**, basic coding knowledge, the ability to write clear documentation, and the **capability to look for solutions over the internet.** - **Must be available to work from 8 PM Manila time for 8 hours from Tuesday to Friday and from 5 PM on Saturday for 5 hours. Days off are Sunday and Monday.** - The work schedule for this position depends on the operational hours in Europe, resulting in varying work timings. However, to ensure proper planning and work-life balance, the schedule will be provided at least one week in advance. This arrangement allows for flexibility and preparation, accommodating the differing time zones and ensuring seamless collaboration with our European counterparts. - You must have your own laptop or PC, not a tablet or mobile phone, that can connect to the internet. The internet speed must be sufficient to handle online meetings. Additionally, you must have a mobile phone that can install apps like WhatsApp, Viber, and Telegram. - Currently pursuing a degree in Web development, or a related field, or an equivalent portfolio of work. - Basic graphic design, layout, typography, image manipulation, and color correction skills. - Creative thinker with attention to detail. - Above average understanding and proficiency in using WordPress. - Ability to work independently and meet deadlines. - **Ability to work independently with minimal supervision and meet deadlines.**

Tasks to be Done	- Assist in the development, maintenance, and updating of WordPress websites. - Assist in the conceptualization and implementation of design solutions from concept to completion. - Write clear, concise, and comprehensive documentation for web projects and processes. - Collaborate with the development team to create and implement web solutions. - Manage and prioritize multiple projects within design specifications and budget restrictions. - Perform basic coding tasks to support ongoing projects and website enhancements. - Participate in the creative process with new ideas and graphical content. - Troubleshoot and resolve issues related to website performance and functionality. - **Participate in team meetings and brainstorming sessions.**
Other Provisions	- E-Certificate of Completion (to be sent through email) - Accomplished Performance Evaluation (to be sent through email) - The company can be cited as part of the student's CV for work experience or as a character reference.
