Introduction

My name is Joshua Jason C. Sarte, 22 years old, I live in New Magallanes, Tayug, Pangasinan. And currently a third-year student taking a degree of Bachelor of Science in Information Technology Major in Network Administration at Panpacific University Tayug campus.

As an online intern at Terraland Europe, I was assigned to work as a web developer for the company. Given this role in the company, allows me to develop and enhance my skills when it comes to web developing. Throughout my internship experience I learned a lot of things not only in web development but also in other departments because during Saturday, Sir Kris allows us to learn about what the other departments are doing through reportings. Lastly, being an intern in this company was never boring because of the challenges of the tasks that were given to us and events of the company which made us have connections with our colleagues.

This internship aims to give us an insight on how the industry actually works. Internships help us to gain knowledge in real-world challenges, develop essential workplace skills, and explore potential career paths. Through internship, I have a chance to gain work experiences that will enhance my resume and be competitive and flexible when finding a job. Overall, my internship in Terraland Europe helped me develop skills that I can use for my future career in the IT industry.

Internship Experience

During my internship at Terraland Europe, I worked as a web developer for the company. My job is to develop a website that will be used as a server for the three joint companies which are Terraland Europe, Kutitap Collective Agency, and Tinig UK. This involves creating sub websites that reside inside the main website that we have created.

The key responsibilities and tasks that I have is to ensure that the website is working properly, all the contents that Sir Kris ask to put in the website should be present, and making sure that all the contents are neat and clean so that the website will look professionally and trustworthy for the audiences that will visit the website.

One of the main projects that I have done was developing the izarconnect.com website with the help of my colleague Mar Pastor. izarconnect.com is a website that serves as the server of the company, this is where you will find all the information that you need to know in this company. Another project was the Weekend Palooza website. This website is all about an event which is called weekend palooza that is being held by the company. This involves creating a landing page with several tabs where you can use it to explore the website. Another project is the Mother Tony's Store website. This website involves uploading some of the sample products that are available to Mother Tony's Store and this website serve as an introduction on what the store is all about.

Skills and Competencies

During my internship in Terraland Europe, I have developed and enhanced some skills that I can use for my future career as an IT. First is my skills in web development using WordPress since it is the one that I used to create the izarconnect website and this internship helped me to WordPress effectively. Also, my communication skills have improved because I have to talk to my colleagues regularly. Problem-Solving skills is also improved because due to the limited resources that we have in creating the website, I have to think on what I will do to create the similar outcome with the resources that I have.

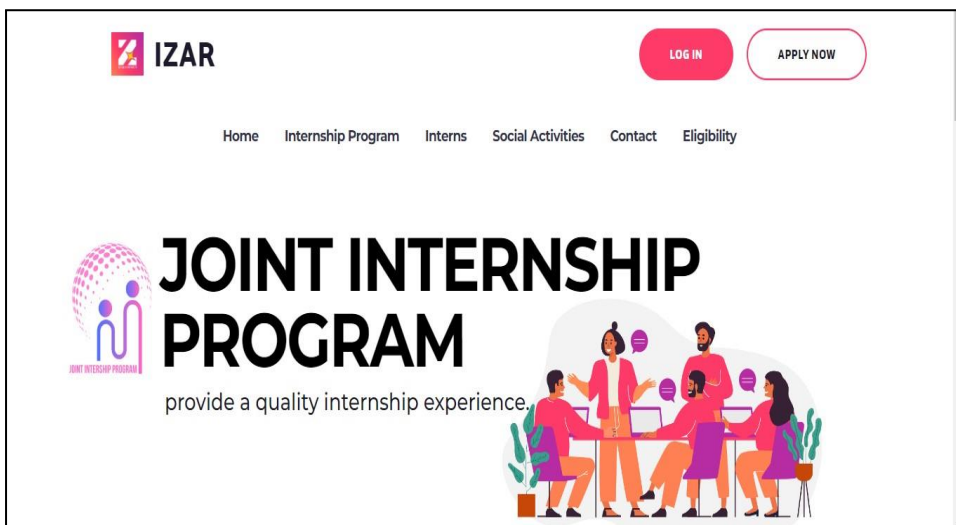

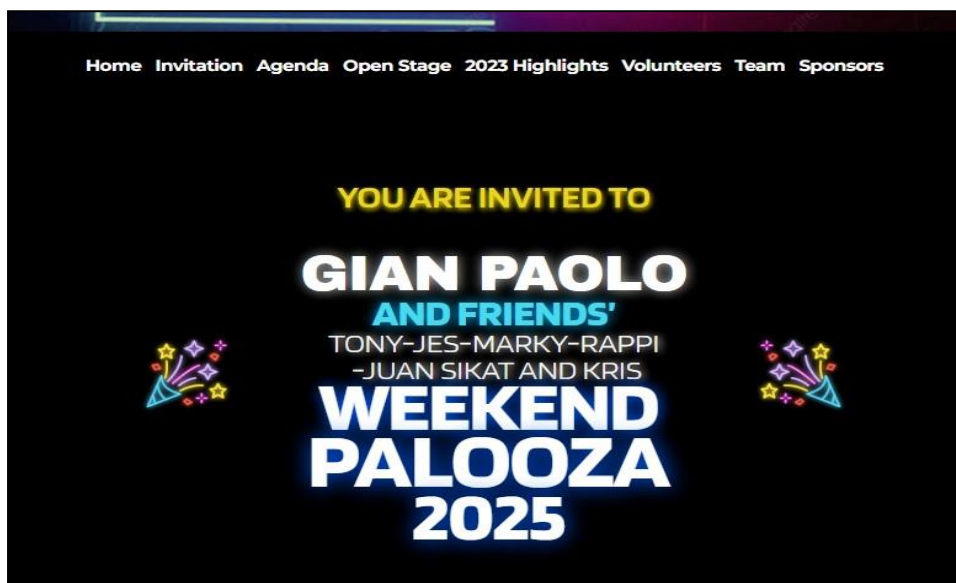

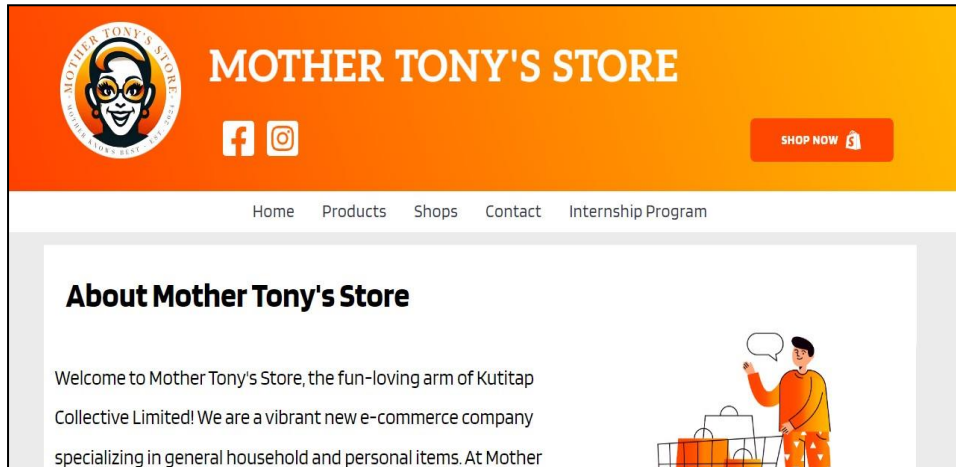

With all the things that I have learned and developed during my internship at Terraland Europe, I can apply this to my future job wherein I can communicate with other people correctly and express my thoughts and ideas that can help our team. Also, if ever I have a client in the future that wants to start his/her own website I can confidently say that I can create it because of the knowledge that I have gained in creating a website during my internship. To sum it up, everything that I have learned when I was an intern will help me not only in my future but also in my daily life.

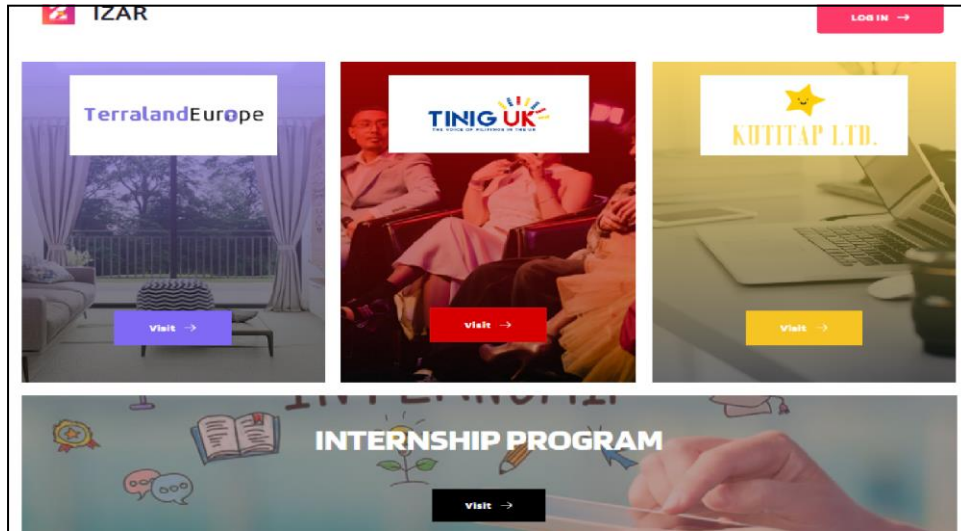

Achievements and Contributions

My major achievement in the company is being able to finish the izarconnect website that will make the Tinig UK, Terraland Europe, and Kutitap Collective Agency discoverable online. This website will serve as their own server that the company can use to store or display all events and companies that they are connected to. And creating a website like Weekend Palooza and Mother Tony's Store so that the target audiences will know more about the store and about the event called Weekend Palooza.

Work Samples

Here are my sample works during my internship.

Context of the Sample:

The images above is some the web pages that I have created in izarconnect.com

- 1: This is the homepage of the Mother Tony's Store website.
- 2: The homepage of Weekend Palooza website.
- 3: The homepage of the Joint Internship Program website.
- 4: Landing page of izarconnect.com

Reflection

During my internship in Terraland Europe, I discovered and gained new knowledge about how a company works and how each department of a company is connected to each other. Also, I have learned that I'm capable of doing tasks that are new to me. With bulky tasks my time management skills have been improved and this internship taught me about the importance of meeting the deadline when it comes to work and being able to communicate with other colleagues will make the work easier and smoother. Since it is my first time using WordPress, it took me a lot of time to learn how to use it. So, my first week in internship was not really productive because I don't know how to use it. How I overcame these challenges is that I searched through the internet for some guides and video tutorials on how to use it and I explored the navigation of WordPress to be familiarized with it. My experience as an Intern in Terraland Europe has greatly influenced me in my career goals that made me want to pursue web development as my career in the future. With all the things that I have learned during my internship, I'm now eager to apply it to what work that I will have in the future.
